**ORDERING
FORD PISTONS MADE EASY**

Due to the fact that over the years engines have been replaced in many tractors, you can't count on ordering pistons by the tractor model number or year.

We have simplified the ordering process.

~Determine the diameter of the piston you are in need of, 4.2" or 4.4".

~Determine the size you need, standard bore size or over sized.

~ Measure the distance from the center of the pin hole to the top of the piston (see diagram) to find the value of A.

~Measure the pin diameter to find the value of B (see diagram).

~Choose the piston that matches your findings.
